Parasoleil Launches Eclipse Collection

*The New Collection Introduces All-in-One Artistic Panel Structures
for Shade and Screen*

WESTMINSTER, Colo. — [February 5, 2020] — Parasoleil, the visionary creator of architectural panels that bridge art and environment, announced today the launch of the **Eclipse Collection™**. The newest addition to the company’s distinctive offering of engineered patterned panels, the Eclipse Collection is the first to feature both shade and screen structures that include the frame and hardware system where the panels are connected.

The ready-to-install collection allows for a turnkey approach to design and installation. The panels were carefully designed to filter light and frame space, infusing life into projects through perfect shade, screen, railing, and, cladding.

“The intent behind the design was to create a natural experience,” said Uriah Bueller, sculptor and Parasoleil’s CEO. “Think of the feeling of sitting under a 50-year-old shade tree and imagine the unique way its branches and leaves filter light. Our goal with this collection is to bridge architecture and nature to create more welcoming places.”

The Solar Series™ is the shade collection that emphasizes a natural interplay of sunlight and shadows offering structures in different sizes and aesthetics that provide sun protection while still allowing air to circulate, drawing the warm air up through the pattern.

Parasoleil

The Lunar Series™ is the screen collection that balances privacy and beauty with screen structures in a modular format. Multiple height options and pattern designs allow for a variety of aesthetics while ensuring a quality product with these engineered panel systems.

Focused on artistry and engineering, the Eclipse Collection is furthering the Parasoleil difference, which has made the company a popular choice for contractors, architects, and developers.

Bueller says, “We give architects and designers the confidence in the quality needed for their project requirements. By reducing risk, cost, and time of the project, we provide our clients the ability to focus on their overall design.”

The Eclipse Collection enhances Parasoleil’s product offering and unveils the company’s ability to bring efficiency from idea to design, design to production, and production to installation. The Solar Series and Lunar Series details and specifications can be found at
