Parasoleil's CEO Uriah Bueller Receives WELL Credential from International WELL Building Institute

Bueller's dedication to health and well-being continues to drive Parasoleil's vision

WESTMINSTER, Colo. — [April xx, 2020] — Parasoleil, the visionary creator of architectural panels that bridge art and environment, announced today that the company's CEO, Uriah Bueller, has earned the coveted WELL Accredited Professional™ (WELL AP) credential through the International WELL Building Institute™ (IWBI).

The WELL AP credential is the newest industry certification, which can be earned by individuals demonstrating advanced knowledge of health and well-being in the built environment and specialization in the WELL Building Standard (WELL). WELL is an evidence- and performance-based system for measuring, certifying and monitoring features that impact human health and well-being.

"We view our role as a conduit between art and environment," said Bueller. "What that means is we focus on enhancing the wellbeing of people in various urban environments. We do that through designing and manufacturing architectural panels that frame space and filter light in a way that resembles nature and are engineered to the highest standards."

Bueller, known for taking simple, bold, instantly recognizable patterns inspired by nature and combining them with a sense of form with function, pursued the IWBI certification in order to be among an elite group of professionals dedicated to improving health and human experience through design.

"There is a clear connection between mental health, physical healing, and natural environments," added Bueller. "While we might have known this for a while, science is now

Parasoleil

proving that the difference we've been making together is real. Emotional wellness, including adequate access to shade and daylight are an essential component and we are glad that the WELL Building Institute recognizes that.”

About Parasoleil

Parasoleil is a leader in designing and engineering architectural metal panel systems that bridge art and environment to create places where people want to be. Established in 2006, the Colorado-based company creates proprietary designs that add function and beauty to public and private venues across North America. An award winner in design, engineering, and product innovation, Parasoleil continues to transform indoor and outdoor spaces through the fusion of art and engineering. Parasoleil demonstrates its ongoing commitment to the environment through sustainable processes, education, and community involvement. For more information, please visit www.parasoleil.com or call 303-589-4524.

About International Well Building Institute

The International WELL Building Institute (IWBI) is leading the global movement to transform our buildings, communities and organizations in ways that help people thrive. WELL v2 is the latest version of its popular WELL Building Standard, and the WELL Community Standard pilot is a district scale rating system that sets a new global benchmark for healthy communities. WELL is focused exclusively on the ways that buildings and communities, and everything in them, can improve our comfort, drive better choices, and generally enhance, not compromise, our health and wellness. IWBI mobilizes the wellness community through management of the WELL AP credential, the pursuit of applicable research, the development of educational resources, and advocacy for policies that promote health and wellness everywhere. IWBI is a participant of the United Nations Global Compact, the world’s largest corporate citizenship initiative, and helps companies advance the UN Sustainable Development Goals (SDGs) through the use of WELL. More information on WELL can be found here.
